BEAUTIFUL
CUTFLOWER

— GROW IT —

You will like it—your customer will love it.

A beautiful, clear, deep pink of the size of a silver dollar, the flowers are borne in great abundance on a straight, graceful stem 24 inches high during June and continues to bloom in late summer and fall until frost. As a cutflower it stands up well and lasts for many days. It's beautiful pink color blends well in any floral arrangement. It brings grace to any flower-piece.

Strong ready-to-flower plants \$2.00 per 10; \$15.00 per 100

— SEED —

To give our customers an opportunity to try this beautiful Armeria at a small expense, we offer for the first time a limited quantity of our own grown and harvested seeds, of our spring 1944 crop for July delivery and sowing.

Generous Trial Package	\$1.00 cash
Per Ounce	\$7.50 cash

DIRECTIONS FOR SOWING SEED: Sow in July as soon as received. Prepare seedbed with screened, well fertilized soil. Soak several hours before sowing, then level it smoothly and tamp down lightly. Sow the seed thinly and evenly and then cover up with fine screened soil or peat-moss to a depth of one-fourth inch, perfectly level and then tamp down solid. Afterwards sprinkle with a fine spray twice daily. Leave the plants in the seedbed for two summers, then transplant if you wish.
